FREE OFFER

KOSKI POLYLAM

The **BEST** board for **STRIPPERS**

Don't let jam ups in your stripping station shut down your diecutter. Call us at Rayner and we will send you or your diemaker a free 36x48 board for your next stripper.

The hardened glass-smooth Melamine Laminate on this board floats the paperboard across it as the job flies through the stripping station. The laminate also maintains a crisp edge for clean shearing of all nick tags. At just a slight increase in price over birch, you gain in quality and save in time and labor.

Call 800-331-8811 to order your sample today.

Polylam is produced in Finland by Koskisen - ISO 9001, ISO 14001 and SMS1003 certified for quality, reliability, and environmental standards.
